**C**ovid-19 Coronavirus pandemic posed adverse impacts on businesses globally. Jobs were cut and production suspended. The wood-based sector of Sarawak was not spared from this global phenomenon.

This was evident by the market performance of Sarawak's timber and timber products which declined by 11 percent for the first quarter of 2020 (1Q2020) compared to the corresponding period last year.

Export earnings from Sarawak's timber and timber products for 1Q2020 dropped to RM1.1 billion from RM1.3 billion during the same period last year. This was attributed to the impact of Covid-19 pandemic and the shift of market demand to value-added products.

Plywood remained the main export item of the wood-based sector of Sarawak for 1Q2020 at RM654 million compared to RM713 million during the same period last year. This represented a decline of 9.5 percent.

This was followed by logs, sawn-timber, fiber boards and wood chips which accounted for RM143 million, RM128 million, RM73 million and RM61 million respectively.

Japan remained the major importer of Sarawak's plywood at RM433 million for 1Q2020. India on the

other hand was the major importer of Sarawak's logs at RM76 million while the Middle East was the main importer of Sarawak's sawn-timber at RM57 million.

Although Japan was the main market for Sarawak's timber products, its market share dipped by 14 percent to RM565 million for 1Q2020 compared to RM661 million during the corresponding period last year.

The other four major markets of Sarawak's timber and timber products for 1Q2020 were the Middle East at RM155 million compared to RM111 million for 1Q2019, India at RM85 million compared to RM104 million for 1Q2019, Taiwan at RM72 million compared to RM70 million for 1Q2019 and South Korea at RM58 million compared to RM69 million for 1Q2019.

Numerous consultations were conducted by the State Government with the industry players including LPP holders, plywood and furniture manufacturers as well as timber exporters to generate ideas to assist the industry amid the challenging times.

The consultations concluded with various proposals on government's supports to ease the timber industry to progress especially the SMEs and to encourage the industry players to optimise the use of logs from planted forests.

Currently, sawmills in Sarawak are equipped with machinery to process huge timber from natural forests. Planted forest logs, however, are relatively smaller. It is, therefore, vital for the industry to embrace transformation by replacing the machinery accordingly and focus on automated production to ensure competitiveness.

Technological advancement is equally important to ensure cost effectiveness. This will reduce labour intensive operations and mitigate the impact of labour policies such as minimum wages and foreign workers' levy.

With dwindling natural forest log production, planted forests will be the main source of raw materials for local processing with the projected annual log production of 5-6 million m<sup>3</sup>.

The way forward for the industry is to focus on R&D to promote the use of planted forest logs to produce value-added products such as furniture and engineered wood. It is also important to lure foreign investors to catalyse the growth of export markets for these products.

# Laminated Flooring

## - New Favourite For Homeowners Globally

Mr. Liew showing an array of his laminated flooring samples

*Samples of Synchronwood.Com laminated flooring.*

**S**ynchronwood.Com Sdn Bhd (Synchronwood.Com) is based in Malaysia, with its head office in Kuching, Sarawak. Its core business is manufacturing wood flooring products. The company was incorporated on 12 August 2009.

Synchronwood.Com is the latest manufacturer of laminated flooring in Malaysia. It has more than 100 different types of products with natural wood design. More are being designed and selected to ensure that the products are trendy.

What is distinctive about the products of Synchronwood.Com is that customers can feel the exact texture of the natural wood grain. This creates a unique character to each product design.

Mr. Liew Tai San, Co-Founder and CEO of Synchronwood.Com said, "Laminated flooring has become a new favourite for many homeowners globally, replacing

the more expensive solid or engineered hardwood flooring, stone and ceramic tiles. It is installed by a proven technology called a 'floating floor' system that has become famous over the last two decades. Europeans have enjoyed the benefits and features of laminated flooring. Presently, laminated flooring is also popular in other developing countries including the Association of Southeast Asian Nations (ASEAN) and being widely used in residential and commercial projects."

According to him, there is huge market potential for laminated flooring products. In ASEAN countries, he estimated that more than 20 million square meters (m<sup>2</sup>) are consumed annually adding that the projected annually consumption for the global communities was 500 million m<sup>2</sup>. "Our made in Malaysia laminated flooring products, have gained quality recognition internationally for its excellent moisture resistant core board which is made of high density tropical hardwood fibreboard (HDF).

This competitive advantage was possible through partnership with an established local HDF producer, Daiken Fibreboard Sdn Bhd in Miri, Sarawak," he said.

Currently, there are three major laminated flooring manufacturers in Malaysia, with a combined production capacity of about 20 million m<sup>2</sup>. Apart from Synchronwood.Com, the other two are Robina Flooring Sdn. Bhd. and Staihelm Industries Sdn. Bhd. in Peninsular Malaysia.

Mr. Liew highlighted that Synchronwood.Com is poised to scale new heights due to steady demand for laminated flooring products from both local and export markets, with promising double annual growth rate from some countries. "Sarawak is blessed with forest resources in which wood-based processing is one of the high impact economic activities promoted under Sarawak Corridor of Renewable Energy (SCORE). Synchronwood.Com operates near the Kuching Senari Port,

strategically places it within a fast-growing Asian market," he said.

With the whole production process under one roof, Synchronwood.Com ensures complete and uninterrupted control over each stage of the production, from customised design to packaging. This enables Synchronwood.Com to produce up to six million m<sup>2</sup> of laminated flooring products annually. Customers can choose from its factory brand, OEM brand or even non-branded packaging. Synchronwood.Com is ever ready to meet customers' demand.

"Synchronwood.Com offers customised products for niche markets. The products range from low cost to high end laminated flooring, wooden flooring to innovative hybrid products. The factory and manufacturing facilities enable customers to select our flooring products with or without V-groove," Mr. Liew said.

He emphasised that Synchronwood.Com's products comply with Euro Standard EN13329 certified by EPH Institute of Wood Technology in Germany, which is proven to provide higher resistant against moisture, heat, abrasion, termite, fading, stains and impact.

"We strive to be sustainable and eco-friendly by using reclaimed wood as our flooring coreboard. All our materials are certified eco-friendly by Programme for the Endorsement of Forest Certification (PEFC) and Singapore Environment Council," he said.

Mr. Liew elaborated that Synchronwood.Com is focusing on technical expertise and innovation to ensure higher margin and to add value to downstream activities besides generating revenue for the state and the country as a whole. In tandem with this, he said the company subscribes to innovation through research and

development in order to produce natural wood grain and real touch Luxury Matt surface Laminated Flooring.

In terms of marketing strategy, he mentioned that Synchronwood.Com strives to ensure customers' satisfaction through exclusive and unique designs that are fully proprietary.

Mr. Liew has excellent achievement in laminated flooring industry. Before establishing the company, he worked for the leading laminated flooring, Robina Flooring Sdn Bhd for 10 years. Initially employed as the Plant Manager, he was promoted to various posts including General Manager (Manufacturing), General Manager and the Advisor of the Company Board till December 2010. His immense experience helped Robina Flooring to grow from a young laminated flooring company to a world renowned manufacturer, exported to more than 35 countries worldwide.

Samples of Synchronwood.Com laminated flooring.

Mr. Liew showing the various brands of his laminated flooring.

Mr. Liew sharing the business profiles of Synchronwood.Com.

The key management team behind the factory have extensive marketing experiences and laminated flooring manufacturing technology knowledge, most of them were more than 20 years in the Wood and Flooring Industry. The CEO is the first and only Malaysian Laminated Flooring Inventor of a glue free flooring installation joint system. Traditionally, all wooden floors were installed with glue down or Tongue & Groove installation. Two Patents have been granted by the Intellectual Property Corporation of Malaysia (MyIPO) for this innovation that refines the installation system. With the glue free click system, the installation

time reduces while care and maintenance become easy.

"With the support of both the state and federal authorities, Synchronwood.Com is expanding and continuing to enhance its global competitiveness. Malaysia is renowned for its natural wood-based products and Synchronwood.Com is proud to be part of it. Its product range is of the highest quality standard which has gone through stringent product testing," Mr. Liew said.

According to him, Synchronwood.Com is among the few factories that were able to produce Super E0 / Japanese F-4 Stars

low formaldehyde Emissions Tropical Hardwood HDF Laminated Flooring.

He added that Synchronwood.Com has developed the first of its kind Waterproof Wooden Flooring and is awaiting the right timing to approach and launch this innovative product to the global market.

# Timber Industry Contributed RM2 Million To Curb Covid-19

**T**he global communities were at risk by Covid-19 which claimed hundreds of thousands of lives. Medical personnel particularly those at the frontline were vulnerable to this pandemic due to their direct contact with the patients.

In support of the government's efforts to break the chain of this virus, STIDC and the Sarawak Timber Association (STA) contributed RM2 million worth of Covid-19 test kits to Sarawak Disaster Management Committee (SDMC) to help medical front-liners curb Covid-19.

The contributions were given in the form of 105,000 pieces of disposable medical masks, 10,000 pieces of isolation gown (non-sterile), 10,000 pairs of medical boots cover, 10,000 pieces of KN95 medical protective masks, 10,000 pieces of medical head cover, 5,000 pieces of protective medical coverall (sterile), 5,000 pieces of medical goggles, 5,000 pieces of face shield and 200 boxes of medical vinyl examination gloves.

Deputy Chief Minister of Sarawak and Chairman of STIDC Board of Management, Datuk Amar Haji Awang Tengah Ali Hasan emphasised that the contributions were necessary to assist our selfless medical front-liners who risked their lives to save others.

He added that the contributions also manifested the support and commitment of the wood-based industry players in Sarawak to the state government in curbing Covid-19 together.

"It is hoped that more organisations and bodies would lend their helping hands and contribute. We are all in this together and let us be united and pray that we all pull through this difficult time to become stronger and more resilient," he said while commending STIDC and STA for their contributions.

Deputy Chief Minister and SDMC Chairman, Datuk Amar Douglas Uggah Embas received the contributions witnessed by Local Government and Housing Minister Dato Sri Dr Sim Kui Hian, STIDC General Manager, Haji Hashim Haji Bojet and his Deputy, Mdm. Dayang Nena Abang Bruce and STA Chief Executive Officer, Mdm. Annie Ting.

# PUSAKA Capital Brings Progress Into Tanjung Manis

## Background

PUSAKA Capital Sdn Bhd (PCSB), a wholly-owned subsidiary of Sarawak Timber Industry Development Corporation (STIDC) was established in July 2013 as a Special Purpose Vehicle (SPV) to implement the Reorganisation and Rationalisation (R&R) Exercise of STIDC. It was officially launched in October 2014.

PCSB subscribes to the culture of CARE (Courage, Agility, Responsibility, and Effectiveness). At the same time, it embraces the values of Integrity, Nurturing, Reliability, Positive Mind-Set and Expertise.

## Driving Growth

Since its inception, PUSAKA Capital Group (PCG) has embarked on various development projects in Tanjung Manis, bringing progress into the township that was previously a cluster of fishing communities, with little to no access to modern amenities and conveniences such as electricity and tar-sealed road.

One of the projects is the palm oil bulking storage facility with a capacity of 32,000 tonnes. The facility began operating in May 2017. PCG also completed

Liquid Bulk Petroleum Products Depot project in December 2018. The depot is used to store up to 12,000 tonnes of bitumen. In May 2019, the company completed the construction of 200 units of government quarters, adding to the existing accommodation for workers in Tanjung Manis.

## Diversified Business

PCG experiences tremendous growth and diversifies into various businesses such as the distribution of petroleum products, logistics and services, agri-business, and timber-related activities.

## Distribution of Petroleum Products

PCG reinforces their core business by offering one-stop business centre in supplying petroleum products in Sarawak. Having to own and operate Bitumen Depot located in Tanjung Manis and as an authorised supplier and distributor of PETRONAS Bitumen, Lubricants and Diesel, the company is committed in becoming the one-stop business centre to support the diverse needs of their customers throughout Sarawak.

## Logistics & Services

As a licensed and exclusive port operator for 60 years, PCG provides optimal port management services for Tanjung Manis Port. The company covers various arrangements and procedures involved in operating cargo terminal and oil as well as gas and chemical jetty. PCG also offers service on shipping and port handling activities besides wharfing services.

## Agri-Business

The company continues to strengthen its footprint in agri-business sector by investing and involving in the proposed aquaculture and agriculture related activities in Tanjung Manis Halal Hub.

## Timber-Related Activities

Apart from manufacturing wood residue products, the Company also invests strategically in acacia. PCG also diversifies into harvesting and replanting of planted forests in Bintulu.

## Milestones

PUSAKA Capital Group strives to develop and commercialise industrial and economic activities and to accelerate the development of Tanjung Manis in order to support the overall industrial growth in the central region of Sarawak as well as in the southern corridor of the Sarawak Corridor of Renewable Energy (SCORE).

# Carving

Excellence & Harmony

**WOOD CARVING** is a tradition and living legacy of the people of Sarawak reflecting the diversity of cultural experiences and moods. It is a tradition that has brought to light the resourcefulness and skills of our people since time immemorial. Wood carving depicts a continuous evolution of man and his forest environment, working towards its esteemed goals of harmony and excellence.

The wood carving training programme conducted by STIDC serves to impart and develop carving skills amongst the younger generation to preserve and nurture this priceless cultural heritage.
