RESTRICTED CIRCULATION

JULY 2017

VOL 07: 2017

message from managing director.

Chemsain members in Kuching have been looking forward to an exciting change of working environment. This happy event will come soon as our new building at Rock Road Kuching is almost ready for us to make application for Occupation Permit soon. It is expected that all Chemsain Divisions will move into the new Chemsain Building in September 2017. Then all of us in Kuching will be housed in one building instead of as at present in various shophouses at Wisma Ko-Perkasa. Not only that our workplaces are congested but we are also facing great difficulty daily in getting places to park our vehicles in an area with limited parking lots. Soon all these problems will be behind us.

The new building is a symbol of the joint efforts of Chemsain members who have made the company's dream come true. There are some key members of Chemsain who have worked so hard to make this dreamed project a reality. Looking back, Chemsain has been in existence for about 32 years. It first started its business operation on 2 floors of a small 3-storey shophouse at Tabuan Jaya, Kuching. The first move after about 3 years there was to our present place, Wisma Ko-Perkasa, about 29 years ago. At first, we took up one unit of 4-storey shophouse and with steady development and growth of Chemsain business activities, we have progressively been taking over vacant units of shophouses or floors until now to an equivalent of about 7 units out of the 20 in our locality.

With the vision and passion for further development of Chemsain, supported by strong human spirit, commitment and dedication of our members, this will surely help to ensure further growth and success of the company. Let us continue to move harmoniously forward united in strong dedication to do our utmost best for Chemsain and its members with the blessing of the ONE Above.

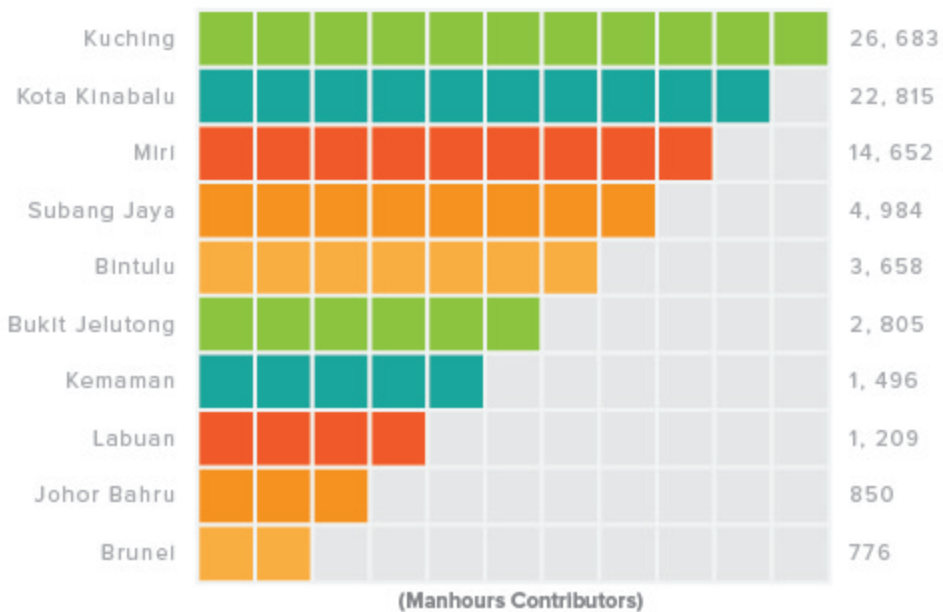

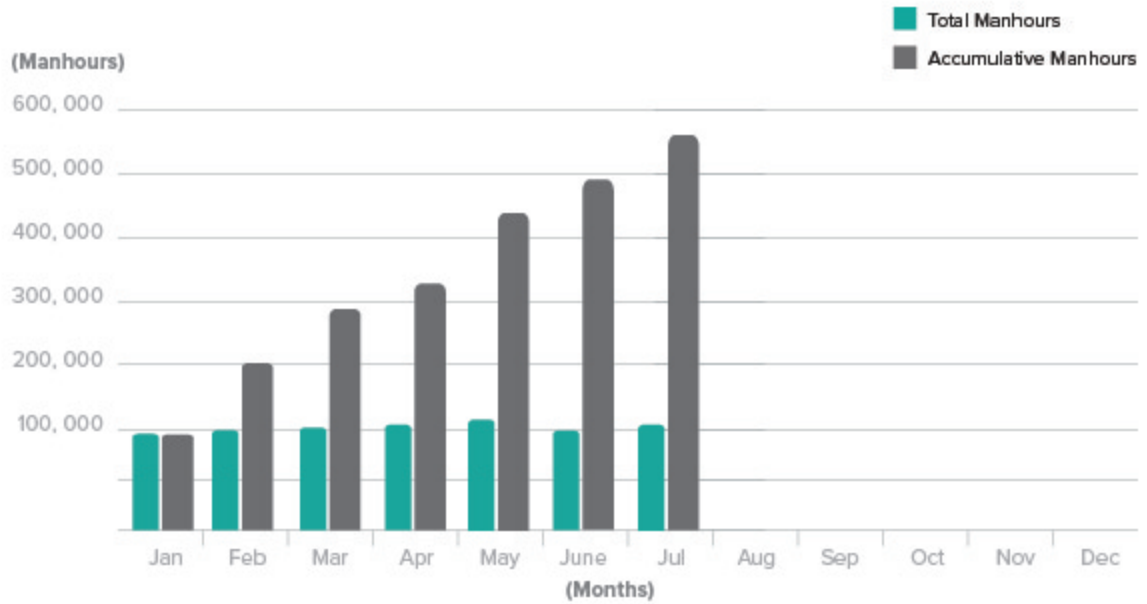

Chan Woon Peng

CHEMICAL MANAGEMENT IN THE WORKPLACE TRAINING

Date: 12 - 13 July 2017 | Venue: M Hotel, Kuching

By Cassandra Henry

According to WHS Council, chemicals are used extensively in workplaces and even in our homes. Many products such as paint, plastics, adhesives, detergents, and pharmaceuticals are derived from chemicals, some of which could potentially be harmful. However, for many toxic chemicals, the health effects may take a long period of time to develop.

The Chemical Management training was organized by Chemsain HRD on the 12-13th July 2017 at M Hotel, Kuching, and a very positive response was received from our clients for this training. A total of 29 participants together with OSH1 & Water Business team. For this topic, we managed to get a former Senior Officer of DOSH Malaysia with 26 years of experience in Occupational Safety & Health field, Dr. Syed Abdul Hamid, as a speaker.

On the first day, the training was focused on the Act and Regulation of CIMAH Regulations, USECHH Regulations & CLASS 2013 Regulations. This is more to the theory of OSH regulations and understanding of proper chemical management concept before they proceeded to the group activity on the last day training.

The group activity included were:

- Discussion on the Safety Data Sheet
- Labelling of the chemical
- Understanding the importance of ITP (Information To Public) & creating an ITP sheet whereby should the worst case scenario happen to public & how to disseminate the information to them.
- Explaining the importance of safety reports by competent person.
- Demonstration of safe operation

Date: 12 - 13 July 2017 | Venue: M Hotel, Kuching

Mr. Anthony Rentap Enchana

Absent with apologies:

Ms. Melissa Robert
Ms. Jessica Malagkas

In Attendance:

Ms. Chiam Yu-Mien (Secretary)

SJ & BJ RAYA GATHERING

Date: 21 July 2017 | Venue: Concorde Hotel, Shah Alam

By Juliana Yahya

On 21 July 2017, staffs in Subang Jaya and Bukit Jelutong offices joined in to celebrate Raya held at Concorde Hotel, Shah Alam.

It was great fun getting together and we enjoyed the large selection of buffet dishes served. Even though the occasion was Raya celebration, the highlights and favorite for many of us were the fresh oysters.

Most of us were decked in beautiful traditional attire and some with matching colors. Nice clothes and beautiful surroundings with flashlights of selfies were everywhere.

Thank you to all staffs who attended for your time to make this Raya a memorable celebration. Hope we can gather again for other activities and catch up with each other.

Date: 21 July 2017 | Venue: Concorde Hotel, Shah Alam

ALL THAT JAZZ

Date: 22 July 2017 | Venue: Islamic Information Centre, Kuching

By Carla Logmao Mongado

Another show this year from Chemsain Media Perspectives with the theme, "All That Jazz". After months of vocalising and dance choreography practice, the performances were reflected well by our students. Over 200 tickets were sold for the night.

The performances were based on musicals and songs from Ella Fitzgerald, George Gerhwin and the famous Hamilton play by Lin-Manual Miranda. From those times to now, they had a play of Dear Evan Hansen The Musical, Smash The Musical and Wicked the Musical.

I would like to take this opportunity to thank the team behind the scene for helping. General Assistants for carrying all the needed items for the performance from the studio to IIC. Dearest colleagues, Larry, Arina, Irene and Cassandra for the endless help. Not to forget, our director, Dr. John Chan and family for the support and advices.

Indeed, a night to remember with our talented students with the genre of jazz.

DOE SHARING SESSION

Date: 28 July 2017 | Venue: Department of Environment, Negeri Sembilan

By Lina Chan

Chemsain was invited by Department of Environment (DOE) Seremban to conduct a sharing session with DOE officers and project's Environmental Officers (EO) on the marine ecology monitoring and shoreline monitoring. The Project that was selected for this sharing is the 2 x 1,000 MW coal fired power plant at Jimah Negeri Sembilan, which is under construction.

The presenters Mr. J Somu (Marine Ecologist), Ms Lina Chan (Project's EIA and EMP Consultant), Ir. Lim Sin Poh (Hydraulic Engineer) and DOE officers Ms. Sharifah Zakiah (Sr. Deputy Director) and Ms. Nurhuda Salam.

The objective of the sharing session is to enhance the knowledge on the methodologies of marine ecology and shoreline monitoring and to guide report reviewers on how to interpret the data and information presented in these monitoring reports.

Together with Chemsain's M05 team and Project's Environmental Officers from EPC Contractors IHI, Toshiba and Hyundai Consortium.
